

Where HRG-guided executable evidence is most useful

Dataset	Answer quality	Token reduction	How to present it
MetaQA	In scope	Very strong	Main compact-evidence evidence
WikiMovies	Near ceiling	Small graph	BFS already compact
MLPQ	Stress test	HRG recovers evidence	Cross-lingual relations
KQAPro	Stress test	HRG recovers evidence	Operators / qualifiers

Recommended defense

Use MetaQA as the in-scope result; use MLPQ/KQAPro as diagnostic evidence-recovery stress tests.
