

Offline HRG prior and online executable KGQA retrieval

Offline prior extraction

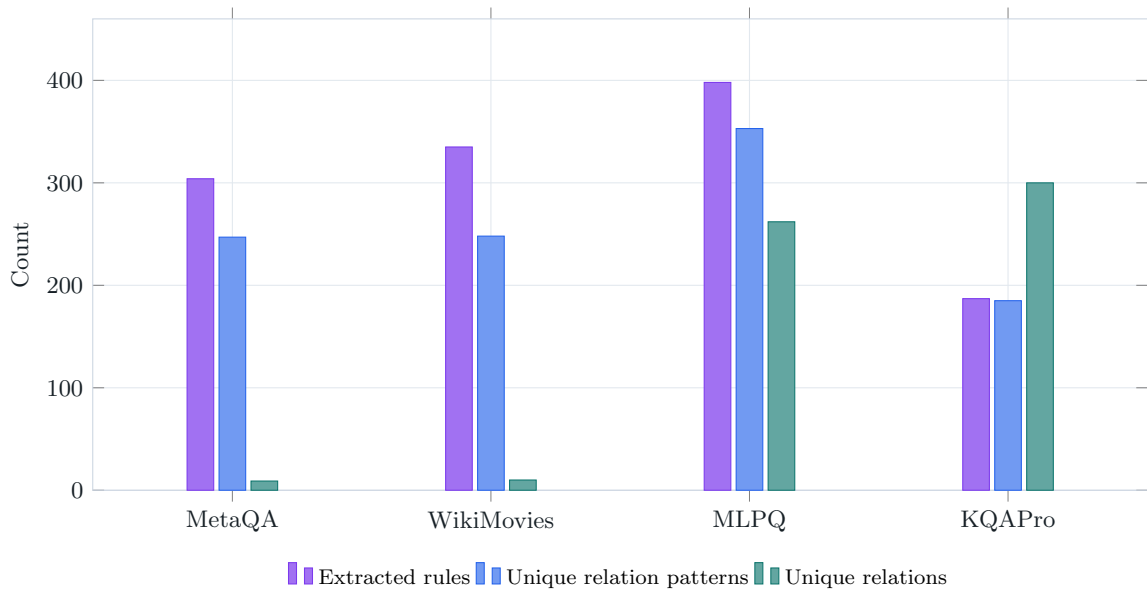

Online QA retrieval

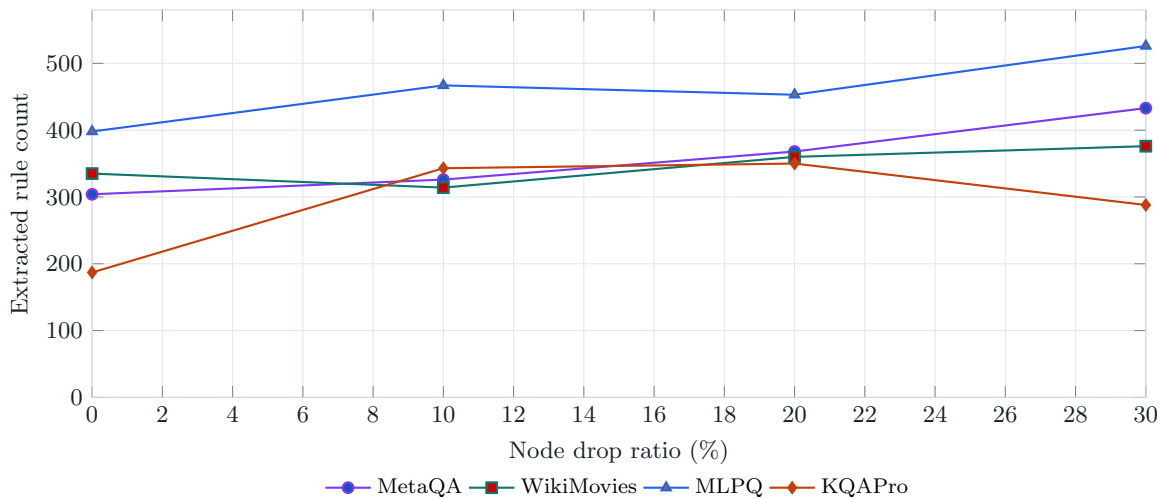

Claim boundary: HRG is a soft structural prior for compact evidence retrieval, not a hard decoder or a universal accuracy guarantee.

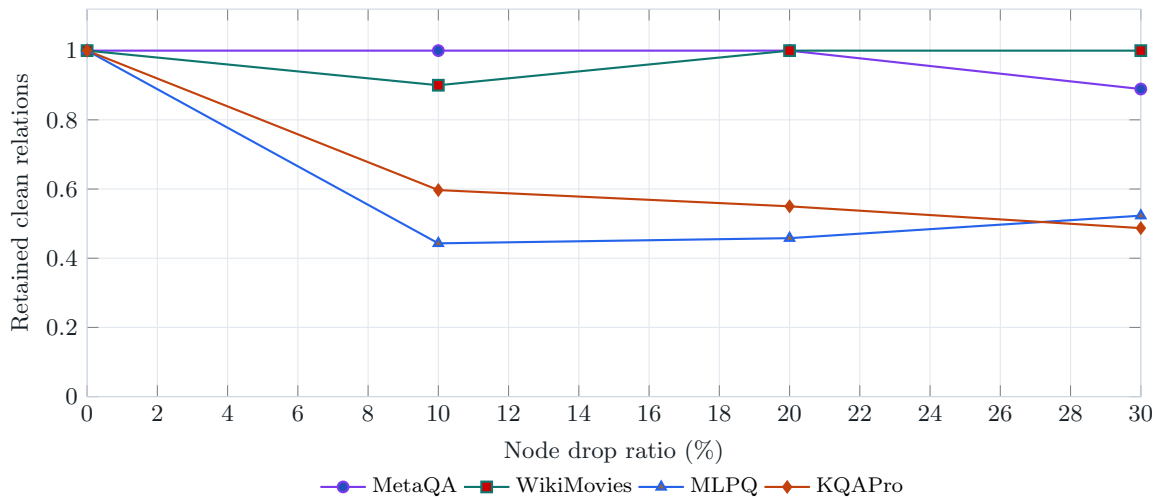

Offline grammar extraction statistics

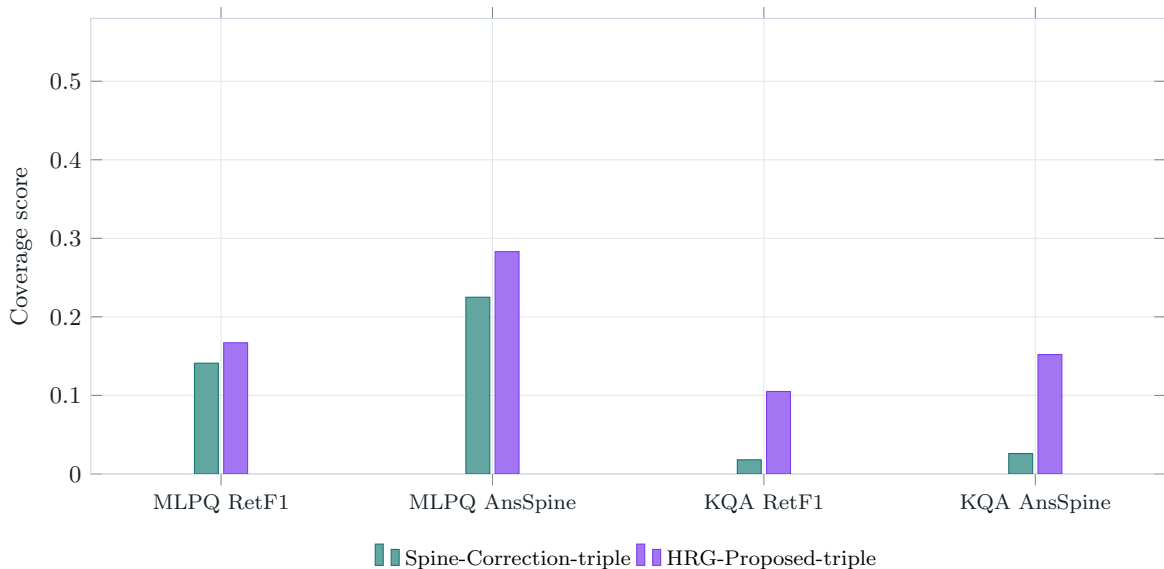

Offline HRG rule count under node deletion

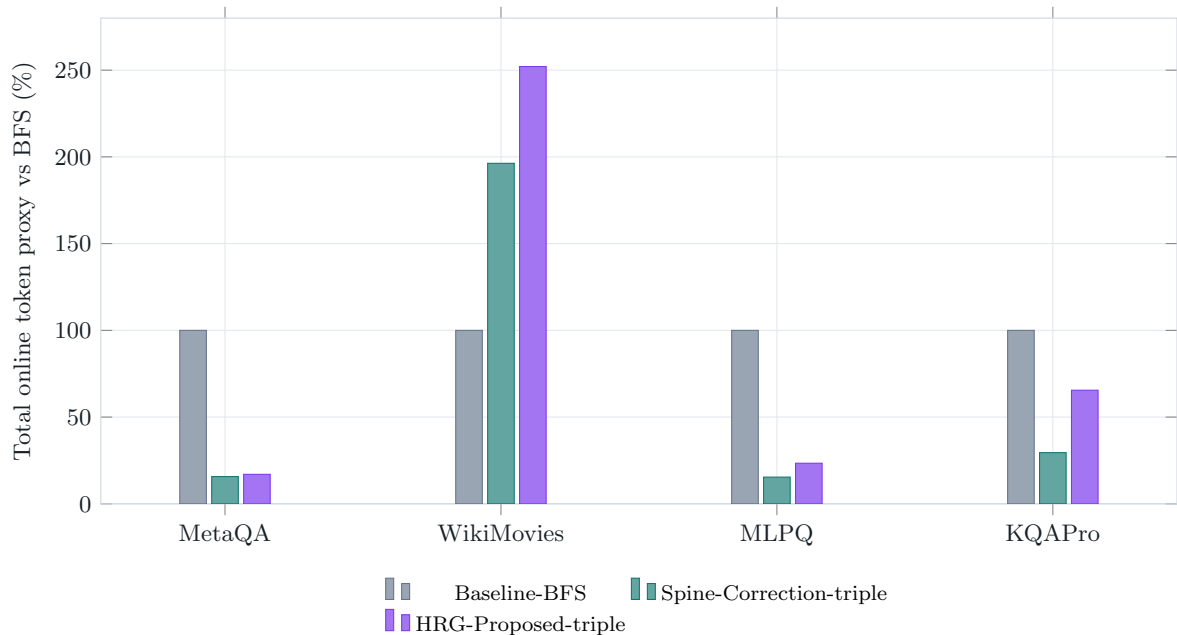

Relation vocabulary retention under node deletion

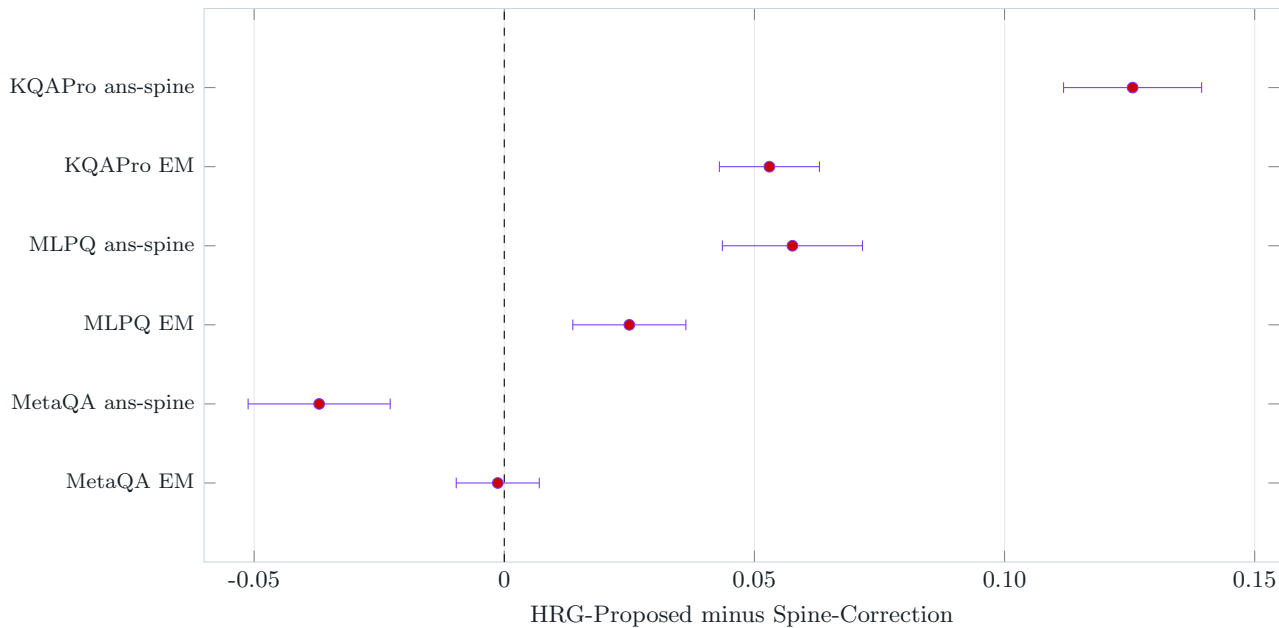

HRG-Proposed improves evidence coverage in hard cases

End-to-end online token proxy ratio, not only final context

Paired bootstrap 95% CI for HRG hard-case effects

Candidate-level prior pilot: HRG score vs relation unigram
